EDUCATION

New England Institute of Technology, East Greenwich, RI

Associate's Degree in Information Technology/Software Engineering – September 2019

Associate's Degree in Graphics, Multimedia and Web Design - March 2015

- Cumulative GPA: 3.34, Earned Dean's List several times while in college

RELATED INTERNSHIP EXPERIENCE

Pfizer, Groton, CT

June - September 2019

Summer Intern - Data Support Technician within Compound Management

- Worked closely with supervisors Travis Mathewson and Lane Milde to develop a dynamic web application.
- Improved data integrity and increased lab technician through the implementation of web-based technologies.
- Web app is currently deployed and being used within Pfizer laboratories.
- Conceptualized and developed a dynamic web app to generate bar codes to be placed on plates for the purpose of identifying compounds. As part of the process, created an admin log in to safeguard the information and to increase the user maintenance. Migrated data from a spreadsheet to an Access database in order to increase security and for maintenance. Gained excellent feedback from supervisors and other Pfizer colleagues

To Whom It May Concern:

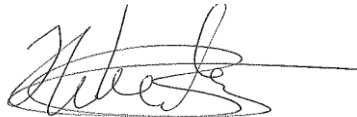

It is my pleasure to strongly recommend J Correia for a developer position with your organization. I have known J since March 2019 when he was a student in my PHP and MySQL class. He also took my capstone class this past academic term. J did very well in both classes. Not only does he grasp content quickly but he is also very personable. He relates well to his peers and his instructors.

The Capstone class is designed to give students the opportunity to develop an application over a period of ten weeks. The requirements include a proposal, a prototype, a technical design document, and implementation as well as a presentation summarizing the process. J handled technical challenges in a very mature and level headed fashion. His project involved a number of different technologies: PHP/MySQL, HTML, CSS, JavaScript, MySQL and git. J came to us with a background in graphic design and his capstone project clearly showed this. His project was solid from a backend perspective but the UI/UX portion was also very well done. We don't often see students combining both skill sets.

J Correia is a very competent developer with great soft skills. I am confident he will be a great addition to your organization.

Please feel free to contact me by email at evanrenselaar@neit.edu or by phone at 401-780-4190 if you have any further questions.

Sincerely,

Erik van Renselaar
Professor, IT Department Chair
